

MP: Human Biology with bound in OLC card

This best-selling text emphasizes the relationships of humans to other living things. Human Biology remains user friendly; relevancy and pedagogy are among its strengths. In this edition, as in previous editions, each chapter presents the topic clearly and distinctly, so that students will feel capable of achieving an adult level of understanding. Detailed, high-level scientific data and terminology are not included, because Dr. Mader believes that true knowledge consists of working concepts rather than technical facility.
