

It is not necessary to know how to do a statistical analysis to critically appraise a paper. However, it is necessary to have a grasp of the basics, of whether the right test has been used and how to interpret the resulting figures. Short, readable, and useful, this book provides the necessary, basic information without becoming bogged down in the mathematical detail that often puts so many readers off statistics. It covers all the ground necessary to critically evaluate the statistical elements of medical research papers in an approachable way. This book is designed for healthcare students and professionals who need a basic definition and knowledge of common statistical terms.

Clinical Handbook for Maternal Newborn Nursing, The Fixer, Season 1, Episode 1: (A JC Bannister Serial Thriller), Mac Walkers 40,000 Feet, Gracefully Insane: Life and Death Inside Americas Premier Mental Hospital, Dance of the Gods, Ballet Friends #7 Ballerinas on Broadway, Appropriation (Whitechapel: Documents of Contemporary Art), The Light in the Lake: The Survival Lake Retreat, Prepper Series, Book 3, Body and antibody;: A report on the new immunology, My First Nutcracker,
