

This book provides a novel focus on adaptive explanations for cranial and postcranial features and functional complexes, socioecological systems, life history patterns, etc. in early primates. It further offers a detailed rendering of the phylogenetic affinities of such basal taxa to later primate clades as well as to other early/recent mammalian orders. In addition to the strictly paleontological or systemic questions regarding Primate Origins, the editors concentrate on the adaptive significance of primate characteristics. Thus, the book provides the broadest possible perspective on early primate phylogeny and the adaptive uniqueness of the Order Primates.

The CIBA Collection of Medical Illustrations (8 Volumes in 13 Books) (Hardcover), Lettres a Sophie Volland (French Edition), Meze: Small Plates to Savor and Share from the Mediterranean Table, Leadership: Theory and Practice, Doctor Who: Twelve Doctors of Christmas, Beauty-Fashion Superbook, includes Jobs, Crowchanger: A Changers of Chandris Novel (Volume 1), Eve of Chaos: A Marked Novel (Marked Series),
